

KAMLAKANT KUMAR

Frontend Developer · React.js · JavaScript (ES6+) · Tailwind CSS
+91 9508447711 · kamlakant.kumar@email.com · Vadodara, Gujarat · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Frontend Developer with hands-on experience building responsive, performant web applications using React.js, JavaScript (ES6+), and Tailwind CSS. Passionate about pixel-perfect UIs and exceptional UX. Pursuing B.Tech in Computer Science with a focus on modern frontend architectures, component-driven design, and RESTful API integration.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Java

Frameworks / Libraries: React.js, Tailwind CSS, Bootstrap, Redux (basic)

Tools: Git, GitHub, VS Code, npm, Webpack, Vite

APIs & Concepts: RESTful APIs, Responsive Design, Cross-Browser Compatibility, Web Performance Optimization

Other: Figma (basic), Agile / Scrum, Unit Testing

EDUCATION

B.Tech – Computer Science & Engineering 2023 – 2027

Parul University, Vadodara, Gujarat

Senior Secondary (Class XII) – PCM, CBSE 2020 – 2022

Gyan Bharti Senior Secondary School, Bihar

Secondary (Class X) – CBSE 2020

Manas Prabha Public School, Bihar

PROJECTS

Personal Portfolio Website

github.com/kamlakantkumar51/portfolio

React.js, Tailwind CSS, JavaScript, HTML5, CSS3

- Architected a fully responsive portfolio with React.js, achieving 95+ Lighthouse performance score.
- Built reusable component library with Tailwind CSS, reducing styling code by ~40%.
- Integrated lazy-loading and scroll animations, improving initial page load time by 30%.
- Optimized SEO metadata and semantic HTML for enhanced discoverability.

Kavach AI – Voice-Controlled Desktop Assistant (Frontend Module)

github.com/kamlakantkumar51/kavach-ai

React.js, JavaScript, Web Speech API, CSS3, Node.js (API consumption)

- Developed React.js interface for real-time voice command visualization and feedback display.
- Built dynamic command history dashboard with state management, rendering live results from Node.js APIs.
- Implemented responsive layout with accessible keyboard navigation for desktop and tablet viewports.
- Integrated Web Speech API for browser-side voice capture, reducing backend round-trips by 25%.

EXPERIENCE

Software Engineering Virtual Simulation – Accenture

2025

- Completed frontend modules covering UI architecture design, responsive development, and component testing.
- Practiced Agile sprint workflows and feature delivery within simulated cross-functional teams.

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Java Programming (Udemy) · Cybersecurity Fundamentals (Cisco) · AWS Cloud Practitioner Essentials (AWS) · Software Engineering Simulation (Accenture)

- Earned Daily Coding Challenge & Streak badges on LeetCode for consistent Java problem-solving.
- Completed Accenture Software Engineering Virtual Job Simulation covering architecture, security, and Agile.
